

2018 IoT International Symposium

Dependable wireless technologies

March, 9, 2018

Yoshimitsu Okayama

Technical Senior Manager, IoT Platform Development HQ

NEC Corporation

Orchestrating a brighter world

NEC brings together and integrates technology and expertise to create the ICT-enabled society of tomorrow.

We collaborate closely with partners and customers around the world, orchestrating each project to ensure all its parts are fine-tuned to local needs.

Every day, our innovative solutions for society contribute to greater safety, security, efficiency and equality, and enable people to live brighter lives.

The challenges of going wireless in the manufacturing industry

Q: Do factories need wireless communication?

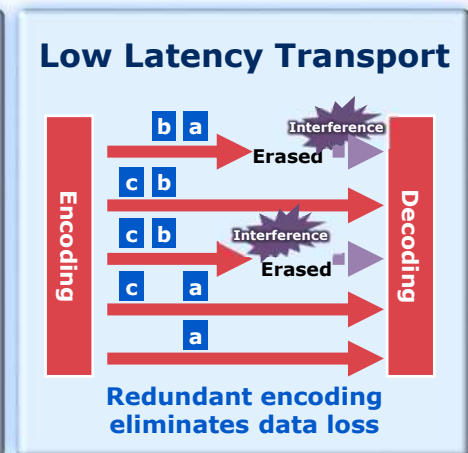

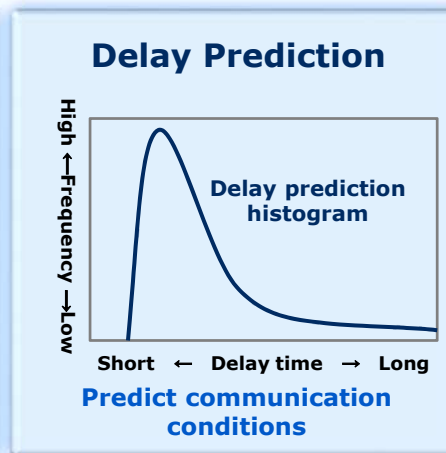

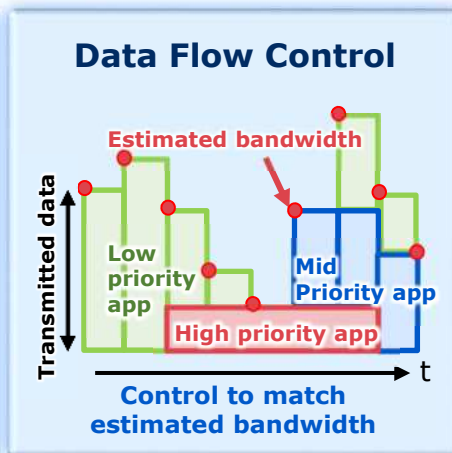

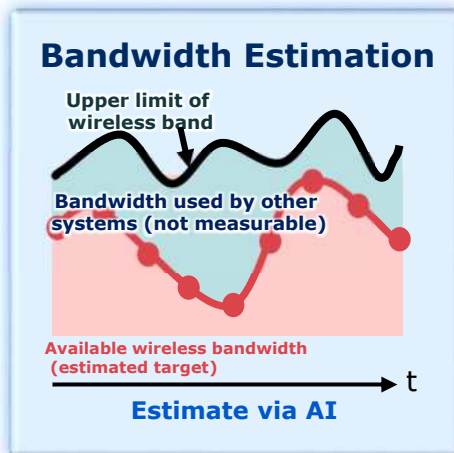

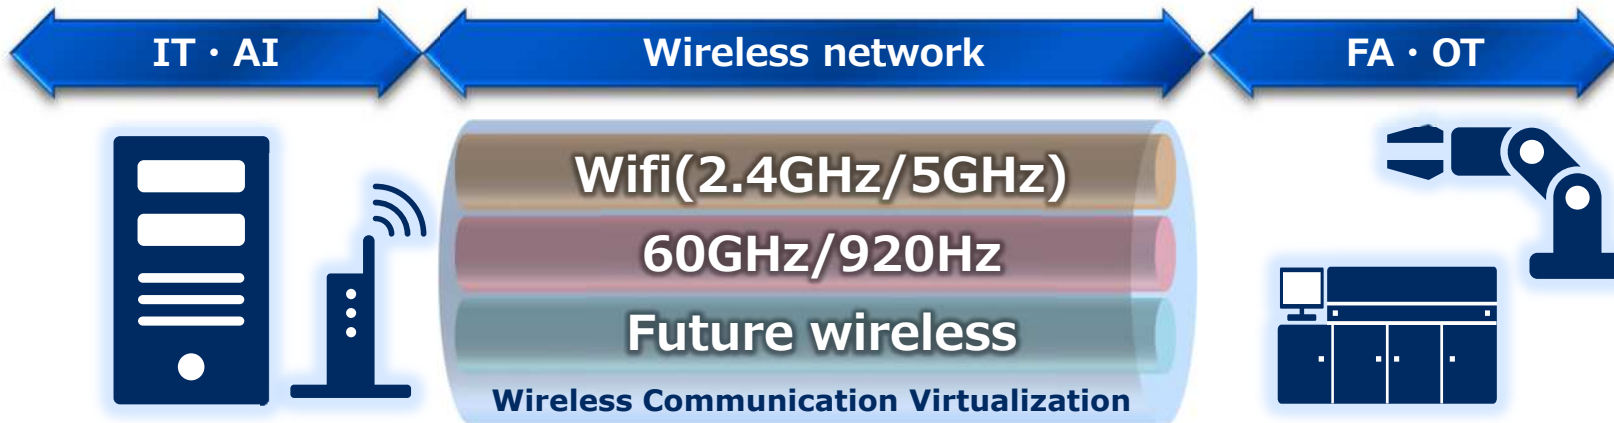

The challenges of going wireless in the manufacturing industry

A: Wireless communication is essential for factories

**Contribute "Dependable wireless"
through realization of Smart Resource Flow (SRF)
wireless platform**

Reliable, low-latency communication supported by IT and AI

Participation in FFPJ and FFPA

Flexible Factory Project (FFPJ)

Evaluate wireless environment and performance during factory operation

Clearly define wireless communication requirements at manufacturing site

Flexible Factory Partner Alliance (FFPA)

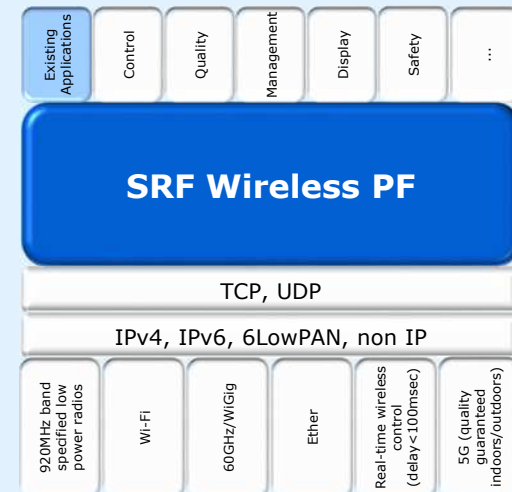

Contribute to business launch and operation

Members:
NEC Corporation
OMRON Corporation
Advanced Telecommunications Research Institute International (ATR)
Sanritz Automation Co., Ltd.
National Institute of Information and Communications Technology
Fujitsu Ltd.
Murata Machinery, Ltd.

SRF Wireless Platform

Our proposal for a standard architecture

Next generation of factories network

Consolidation of Wire and Wireless
Data oriented software defined network
Value chain of knowledge

We appreciate your coming today.

\ **Orchestrating** a brighter world

NEC
